

# Modular Tightening Fixture with Digital Height Gauge.

The modular assembly and measuring device from T-Tool offers you the opportunity to professionally and safely assemble a wide variety of tool holders at an assembly station and to measure the length and height of your cutting tool in just a few steps.

The modular adapters allow for a wide range of tool holder types making it quick and easy to change the modular clamping block.

This gives you a complete solution for all your tool holders at just one station.

The assembly and measuring device is particularly impressive because of its easy operation when clamping and measuring your tools.

See for yourself - we'll be happy to advise you!
